

FALEX TEST

The Falex Test indicates the effectiveness of Champions Choice Chain Life as a lubricating medium.

Chain Life has seven times the load carrying capability of regular lubes.

On the Falex Test, oil fails at 17 in./lbs. of torque under a 500 pound jaw load. The extreme pressure and anti-friction agents used in Chain Life produce results of 45 in./lbs. of torque with a 3700 jaw load.
